07 66 44 75 38
English B2 – French native

danyesk.epro@gmail.com
Driving licence B

Full-stack developer by training (JavaScript/TypeScript) with 2.5 years of experience in web application design and development, both independently and in an agile team. I am looking for a frontend developer position within a structured team, to bring my skills in technical SEO and browser performance.

Technical Skills

Languages	TypeScript, JavaScript, HTML5, CSS3
Frontend	React, Next.js, Vite.js, Tailwind CSS
Backend	Node.js, Express, REST APIs, GraphQL (Apollo), Prisma
Database	PostgreSQL, MySQL, Supabase
Quality & Testing	Jest, Vitest, Playwright, SonarQube, design patterns, code review
DevSecOps	Docker, Git, GitHub Actions, Nginx, Caddy, OVH VPS
Performance & SEO	JS optimization, browser caching, metadata, accessibility, eco-design
Product & UI/UX	Agile, Figma, wireframes, user stories, MoSCoW, UML, data modeling, product discovery, market research.
AI 	LLM agentic workflow, prompt looping, human-in-the-loop

AI Certifications

- Anthropic
- AI Fluency for builder
Building effective human-agent teams
- Google
- AI Fundamentals
AI for App Building

Professional Experience

Full-Stack Developer & Project Manager – Enedis Lab

Apprenticeship – internal social network

Sep 2023 - Oct 2025 - Tours

- Sole frontend developer within an Agile team, shipping the product with TypeScript, React, Vite and Docker, from UX design to production.
- Helped recover value from a ~€1M investment by repurposing 400+ idle interactive screens across 6 regions.
- Gathered user needs and ran comparative studies to frame functional and technical choices.
- Produced design deliverables: data models, use cases, sequence diagrams, backlog, wireframes, UI/UX.
- Presented technical choices to business stakeholders and turned user feedback into product iterations.

Full-Stack Designer Developer – Showcase site – Split Screen

Internship – Showcase website

May 2022 - Aug 2022 - Orléans

- Designed, developed and deployed a showcase website (PHP/Symfony, Twig, Bootstrap) in an Agile loop with the client.
- Gathered requirements and carried out comparative studies upstream of development.
- Documented the processes and ensured the handover of the project at the end of the mission.

Personal and Academic Projects

Independent Project – Agentic AI System

Collaborating associates – Agency AI

May 2026 - Present - Remote

- Designed an LLM-based agentic workflow (prompt looping, human-in-the-loop) that already generates a simple website in about 10 minutes, at 40% of the target scope.
- Streamlining the workflows and extending them to the full Product Engineer scope: design, SEO, performance, security, quality & testing and legal compliance (GDPR, terms of use, terms of sale, legal notices).
- Built with TypeScript and Python, Shell scripting for automation.

Online CV

Jan - Mar 2026

Self hosted (OVH VPS, Docker, Caddy, Nginx)

3D Web

Apr - May 2026

3D integration with Next.js and Three.js (paused)

Ebook

Jun - Aug 2026

Photographer showcase (Next.js, Vercel, Supabase)

Green Step

Sep 2024 - Jun 2025

Ecological challenge platform (React, Figma, Jest).
